

# Linear LED T8 Tube

Rewire

## Product Description

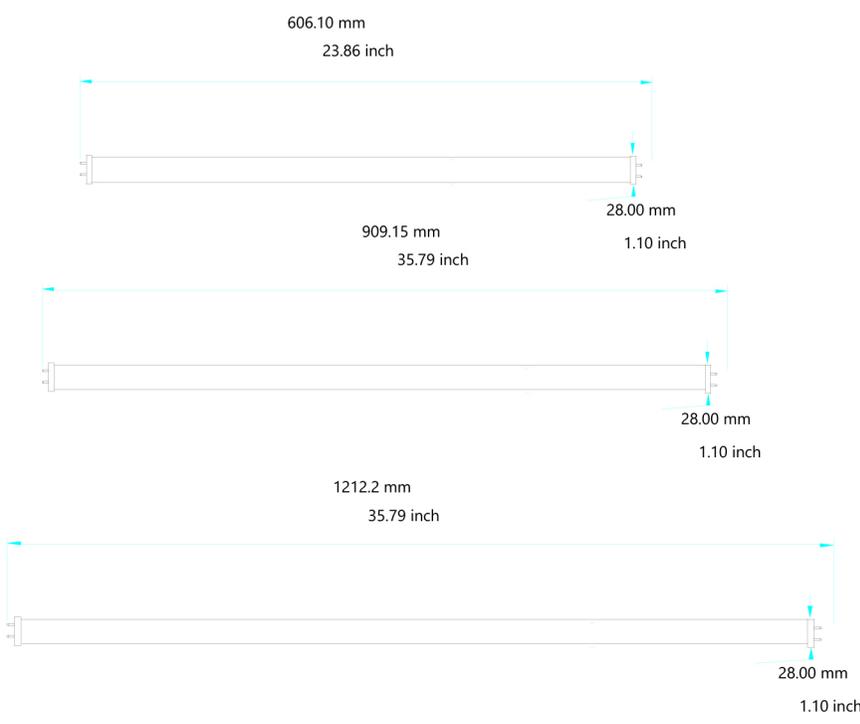

Linear LED T8 tubes are low maintenance and energy efficient alternatives for traditional T12 and T8 fluorescent lamps. They are designed for 120-277 VAC single ended power from mains, and have a dedicated internal driver, rendering the fluorescent ballast unnecessary. Linear LED T8 tubes have a wide field angle, making them perfect for reflector equipped fixtures and wall-mount applications. They are UL listed and should be installed with non-shunted lamp holders.
